

Brand & Model	Lengths	Quick Description
<b>ATOMIC</b>		
X Atomic Vantage W 74	146, 152, 158	The Atomic Vantage X 74 W is a confidence-boosting all-mountain system ski for female skiers who spend most of the time on piste. Groomers, here we come!
X Atomic Vantage 95	162, 170, 178, 186	The Atomic Vantage 95 C ski is perfectly balanced for hard pack and soft snow. With a 95mm waist width it's the second widest model in our progressive all-mountain Vantage series - a ski to take skiers anywhere, any time. This ski is truly all-mountain.
X Atomic Vantage 85	157, 165, 173, 181,	If you want an all-mountain ski that really performs on the piste, you'll love the Atomic Vantage 85. It's an easy-to-handle option that works all over the whole mountain.
X Atomic Vantage W 95	154, 162	The Atomic Vantage 95 C W is our top progressive all-mountain ski for women. It has a 95mm waist width and distinctly wide footprint for performing in any snow and on any terrain. This ski is truly all mountain.
X Atomic Vantage W 85	149, 157, 165	The Atomic Vantage 85 W is the perfect choice if you like the piste but love dipping into the powder. It's the smaller-waist option in our popular Vantage series - progressive all-mountain skis built to be great on hard pack and equally good in soft snow.
Atomic Backland FR 109	175, 182, 189	The Atomic Backland FR 109 ski delivers the very best in Big Mountain powder performance. It's built for charging in deep snow and chop with total confidence.
X Atomic Backland FR 102	164, 172, 180, 189	If you're looking to explore the entire mountain in search of deeper snow, the Atomic Backland FR 102 ski is your ideal companion. At the same time the pronounced camber underfoot ensures optimum edge grip and makes the ski super versatile on hard and mixed snow, too.
Atomic Backland FR W 109	159, 167	We've built the Atomic Backland FR W 109 ski for women skiers who rip in powder. It's the top ski in our new range of freeride powder chargers - successors to the popular Century range.
X Atomic Backland FR W 102	156, 164	The Atomic Backland FR 102 is an easy-going powder ski that's also versatile enough to deliver top performance on hard pack, and a wide 102mm waist mean it handles the groomers no problem.
X Atomic Infamous	151, 161, 171, 176	The Atomic Infamous is our fully loaded Park ski. Inspired by Jossi Wells and built to match the vision of the X Games star, Infamous is all about soft flex and outstanding toughness. When it comes to getting creative in the park, the Infamous is just the tool for the job.
<b>ARMADA</b>		
Armada JJ 2.0		The ski that changed men's powder riding forever returns with its trademark floatation, edging and all around faceshot-making, deep-snow-buttering fun. The JJ 2.0 embraces its heritage as one of the most-awarded, and biggest, developmental leaps in skiing history and carries it forward in 16/17.
Armada TST		The TST's party-in-the-front-business-in-the-back mentality makes this the most versatile men's ski in our lineup: ready to chase powder, punch through the crud and give groomers the business on the way back to the lift. A rockered tip gives you the float you're looking for, while a flat tail is backing you up with power and stability.
X Armada Invictus 85		Boasting the lightest construction of our 16/17 Invictus line, the Invictus 85 is also the quickest edge to edge. Lively, fun and effortless to put on edge and drive through a turn - point this ski downhill and let it take care of the rest. Great all mountain ski that can rip the groomers!
X Armada invicta W 93		This particular one comes in a 93mm width, providing it with extra versatility across the mountain with improved soft snow performance. This all mountain ski will take you anywhere you want to go.
Amada VII 2.0		Pow turns have never been as fun and easy on this iconic women's powder ski. Super playful and lively thanks to a Hybrid Ultra-Light Core, the VII 2.0 begs to hit your favorite tree stashes before ripping the hardpack on the way back to the top.
Armada TST W		Do what you like with this, the most versatile women's ski in our lineup. Chase powder, punch through the crud and drive through turns - the TSTW's EST All Mountain Rocker handles it all and with a Hybrid Ultra-Lite Core it stays as playful as you are.
<b>BLIZZARD</b>		
X Blizzard Brahma	166, 173, 180	The Brahma is the go-to ski on days when cold temps and dry spells make for firm snow conditions. Roll them over on groomers thanks to Brahma's camber underfoot bookended by rocker in the tip and tail. Have fun carving turns on ice, blasting through crud or floating on fresh because of Carbon Flipcore Technology.
X Blizzard Black Pearl	145, 152, 158	The Black Pearl is the backbone of the women's freeride line and intermediate to expert women rave about the fun this ski dishes out on a daily basis. The Black Pearl is the most versatile ski in the Blizzard women's line up. On groomers, in the trees, through bumps and in powder, the Black Pearl performs in every type of terrain.
X Blizzard Bonafide	173, 180, 187	This do-everything ski includes a 98mm waist. The Bonafide is the most versatile ski in Blizzard's Freeride lineup. You can spend almost everyday next winter on the Bonafide and you won't regret it.
<b>DYNASTAR</b>		
Dynastar Powertrack 84	162, 169, 176, 183	Combining the best elements of modern freeride and all-mountain ski design, this breakthrough new one-ski-quiver provides a huge sweet spot, keeping you firmly balanced in the driver's seat across all terrain and snow conditions.
Dynastar Powertrack 79	159, 166, 173, 180,	A progressive five-point sidecut allows for powerful carved turns that engage quickly and release with ease in any snow condition, providing the consistent yet playful versatility and control that sets a new all-mountain standard. Equal parts power and playfulness, maneuverability and control.
<b>FISCHER</b>		
Fischer Pro mountain 80Ti	150, 157, 165	One of the most dependable and versatile skis in Fischer's new Pro Mountain collection! With an 80 mm waist and Air Tec Ti, Wood Core construction, it falls right in the wheelhouse for intermediate to advanced level skiers all over the globe.
Fischer Ranger 98Ti	172, 180, 188,	Testers gave the 98-mm-waisted ski high scores for playfulness, lower for carving and stability. The tips are light and stay on top of powder with this smooth and consistent ski.
Fischer Ranger 90Ti	165, 172, 179	Reliable performance in all terrain: powder, piste and rough terrain - the Ranger 90 Ti gives you stability in every situation. Thanks to Carbon Tip and Sandwich Sidewall.
<b>HEAD</b>		
Head Strong Instinct Ti	156, 163, 170, 177	The mid-fat Strong Instinct Ti is an easy-riding all-condition carver for intermediate skiers who class the entire mountain as their learning ground.
X Head Pure Joy	143, 148, 153	Smooth riding and responsive the Pure Joy is a confidence building progression tool for beginner and intermediate women. LIBRA ski architecture endows the Pure Joy with lightness, perfect balance and outstanding control in all conditions.
<b>ICELANTIC</b>		
Icelandic Nomad 95	161, 171, 181	Its 95mm platform, rockered tip and tail and 2mm of camber underfoot, gives you true versatility all over the mountain. If you are looking for a playful ski that performs from the park to the peaks then the Nomad 95 is the ski for you!
Icelandic Nomad 105	161, 171, 181	The Nomad 105 is Icelandic's flagship model, best-selling ski and the foundation of the Nomad Freeride Collection. Its 105mm platform and bombproof construction.
Icelandic Nomad 115	181	The new beefed up Nomad 115 is a big mountain freeride ski. The additional girth underfoot gives the Nomad 115 the solid platform needed to float in the deepest pow and conquer the biggest lines.
Icelandic Pioneer 96	166, 174	The Pioneer 96 is our one-ski-quiver, with the versatility needed to excel in any condition the mountain has to offer. Its rockered tip and tail combines with 7mm of camber underfoot and a poplar core make this ski snappy, responsive, and stable at speed.
Icelandic Pioneer 109	166, 174, 182	The Pioneer 109 is a powerful all-mountain ski that can handle the soft stuff as well as the hard stuff.
Icelandic Sabre 89	164, 174	The new Sabre 89 is a precise all-mountain carving machine. Its tapered shape combined with a rockered tip, 9mm of camber underfoot and flat tail, creates a powerful stance in any condition, while the rockered tip and maintain a forward, aggressive stance in any condition, while the rockered tip and maintain a forward, aggressive stance in any condition.
Icelandic Oracle 88	155, 162, 169	The Oracle 88 is a lightweight and versatile ski that excels all over the mountain. The slightly tapered design, allows the skier to sustain a forward, aggressive stance in any condition, while the rockered tip and maintain a forward, aggressive stance in any condition.
<b>K2</b>		
K2 Ikonic 80	163, 170, 177	The Ikonic 80 ski features a redistributed dual wood K2 Konic construction with a lightweight and lively Aspen at its center; while it has a denser and more powerful Fir over the edges. The intuitive K2 Konic Technology and all-mountain design of the Ikonic 80 makes skiing in the resorts all day long noticeably more enjoyable with unbeatable performance, regardless of the conditions or terrain.
K2 Pinnacle 88	170, 177	The Pinnacle 88 is a streamlined version of the K2 Pinnacle 95 freeride ski, with all the guts of its bigger brethren. Have you been looking for that mythical bridge between resort skiing and freeride nirvana? Thoughtful, low-density Clayton Vila and Sean Jordan collaboration, the K2 Poacher is our flagship tool of choice to poach the streets, icy park, or spring slush. A durable freestyle player both in the park and beyond, this stick has a Carbon Boost Braided and stiff whatever is within Sight is within reach. The K2 Sight is our ultra-accurate pipe ski, and it'll take you up 22-foot walls or into big landings with fresh style. We've accented this ski's energetic and easy-to-ski aspen core with hardware in the tip and tail for even better durability.
K2 Poacher	156, 163, 170, 177, 184	
K2 Sight	149, 159, 169	
K2 Press	149, 159, 169	The K2 Press packs more pop and ollie power into an affordable model, built for the emerging park skier. We've put our signature Triaxial Braiding to work in a unique Park Flex pattern alongside a naturally easy-to-ski aspen core, and this Forgiving and easy to maneuver, this ski's Catch-Free Rocker and ultra-light composite core keep your legs fresher than morning yoga. Softly rounded tip and tail ease into turns to remind you how much fun it is to fly downhill any season, and classic cap construction ties this delicious piece together - the Luv 75 is the complete package for all-mountain explorers.
K2 Luv 75	142, 149, 156, 163	
K2 Luv Boat 105	163	The new Luv Boat 105 comes packed with Bioflex Konic construction, embracing the proven benefits that Konic and Nanolite tech bring to our men's freeride skis with the female-favorite combination of aspen and paulownia wood core. Your new big-mountain life vest, the Luv Boat 105 was designed to keep you afloat and cruising however the tides may turn.
K2 Alluvit 88	156, 163	The Alluvit 88 slims down and bridges the gap between versatile freeride and confident all-mountain skiing. We don't throw the term "women's-specific" around lightly - the Alluvit 88 was built for the lady shredder who stuns the slopes in deep powder, over fresh cord, and through wily bumps alike.
<b>LINE</b>		
Line Sir Francis Bacon	178, 184	The new Sir Francis Bacon is a refined, everyday ski that delivers an even better all-mountain ride - the kind of ride that made this ski famous in the first place. Floating powder and carving hard pack all with a buttery feel.
X Line Tigersnake	157, 164, 171, 178	Designed by LINE pro Andy Parry and our expert engineers using real experience and real math, the Tigersnake is the most thoughtfully tech-filled and lightest all-terrain freestyle ski on the market at such an affordable price. Our signature Carbon Ollieband™ adds even more pop than you thought possible.
Line Sick Day 110	172, 179, 186	Sick Day 110 is the Jeff Curry-inspired crowd favorite for conquering the slack country, backcountry, and hardpack. Let this ski's lively aspen and tough maple core composite carry you from first bell to last call, or take it out of bounds to taste what LINE pro Andrew Whiteford calls the "perfect combination": lightweight for slogs and boot packs, and able to hard-charge the steepest lines.
Line Sick Day 95	165, 172, 179	Slightly more rigid than the 110 and 102, the 95 is an all-mountain ski poised for speed and bred for steepness both on piste and all over the resort.
Line Supernatural 92	165, 172, 179	The Supernatural 92 is LINE's best medium-width ski for handling all of those hardpack pucker moments and far more. A descendant of the legendary Prophet Ski Series this ski takes it to the next level. Its freshly streamlined shape makes for smooth-as-butter turn initiation and release as well as forgiving edge-to-edge transfer without the talkback.
Line Pandora 95	152, 162	We've wrapped a resilient and dampening yet lightweight Aspenlite™ core in a streamlined cap-sidewall hybrid construction and fine-tuned the ski's shape with five different radius shapes blended together. The LINE Pandora 95 has a Symmetric Flex™ that'll float through powder pockets and our high-end sintered base posited for clean carving and hot laps on piste.
<b>MEIER</b>		
Meier Big Nose Kate 92	155, 165	With its minimized traditional camber & early rise tip, tight turns are effortless from stash to stash. Like its namesake, this ornery cuss of a ski takes nothing and leaves nothing, ripping through any terrain with dexterity and grace.
Meier The Doc 108	174, 184	An outlaw in the backcountry. The Doc, with its minimized traditional camber & early rise tip makes for an awesome all around everyday ski. It's designed to carry you through anything that nature dishes out. It writes the rules. Just like history's favorite gambler.
Meier Quickdraw 88	166, 171, 181	Our new frontside carver. Want to lay it over till you drag your shoulder? Want to have such a solid feel under your ski boots that you feel like you are attached to iron rails? This is the ski designed specifically for you.
Meier Wild Bill 98	175, 185	Wild Bill was gunned down in a card game, but his legend lives on. He Wild Bill is a great all mountain ski utilizing Meier's camRise hybrid technology and absolutely kills it in the backcountry!
Meier Big Hoss 104	185	One of the new models we are introducing into our 2016 line, the Big Hoss is the big dudes answer to the "turny" big mountain hard pack ski. Transfer power effortlessly from edge to edge while storing the energy for that explosive turn.
<b>NORDICA</b>		
X Nordica GT 78	160, 168, 176	The GT 78 is designed for intermediate to advanced skiers looking for a product that aids progression and provides performance as skills improve. It's an easy to use every day ski, ready for all mountain adventure and fun with friends.
Nordica Belle 88	145, 153, 161	At 88mm underfoot the Belle 88 has got enough float for soft stuff, and plenty of sidecut for laying it over on the hardpack. For skiers who do it all, this is your new one ski quiver.
Nordica GT 80Ti	162, 168, 174	The GT 80 was built for any advanced to expert level skier looking for an every day all mountain frontside ski. Featuring the new lightweight dual metal torsion bridge construction, oversized tip and versatile tail shape, it's a hard snow ripper with off trail versatility. Carving focused, power and stability, with
Nordica Patron	185	The Patron is a flat out legend. Built with gamechanging Powder camROCK, a High Rise Profile, a blunt nose tip design and a genius sidecut of 143/113/132, it's easily the most versatile powder ski on the market, superior at speeds, surfy yet stable, and euphorically versatile. It makes every day a best day, from the backcountry to the chairs.
Nordica Enforcer 100	177, 185	Sporting a 100mm waist for versatility, a full wood core sandwiched between 2 sheets of metal for power and stability at speed, a blunt nosed tip to blast through crud, and a low rocker profile for full edge contact on hard snow conditions, the Enforcer is built for those that love to ski. Smooth Powerful Playful Ski everywhere with confidence.
Nordica Enforcer 93	169, 177, 185	New for 2017 is the debut of the ENFORCER 93, a slightly narrower version of the award winning Enforcer, with a shape of 126/93/114. Its smooth, powerful, and playful feel makes this ski one of the most balanced skis we have ever built. From the hardpack to the pow, this ski is an absolute blast.
Nordica Sentra 3	144, 152, 160	Balance, confidence, versatility and support—those are the words of the SENTRA 3, a ski system specially designed to help recreational skiers go powder camROCK, a super light and powerful wicore, and a 113mm waist width ensure that every run is lady's choice on Nordica's big mountain La Nina.
Nordica Santa Ana 100	161	The Santa Ana shares the same footprint as the award winning Enforcer, but with a micro laminate Balsa Core Technology designed exclusively for women. This ski brings lightweight performance to a higher level with a damp metal like feel that gives you confidence, and provides that extra level of edge grip when the snow conditions get firm.
Nordica Santa Ana 93	153, 161	A lively freeski for females who want hard snow performance combined with soft snow floatation. Its balsawood core provides a stable metal like feel for hard snow conditions, while its unique lightness increases flotation and playfulness in soft snow. From groomers to powder this ski is sure to make you smile.
<b>ROSSIGNOL</b>		
Rossignol Super 7 HD	172, 180, 188	Combined with our patented Air Tip technology; Powder Turn Rocker profile; lightweight paulownia wood core construction; and 116mm waist width, the new Super 7 HD offers effortless floatation, steering, and speed control in the snow.
Rossignol Soul 7 HD	164, 172, 180	lightweight paulownia wood core construction; and 106mm waist width, the new SOUL 7 HD is the ultimate fusion of lightweight backcountry innovation and
Rossignol Sky 7 HD	164, 172, 180	Combined with our patented Air Tip technology; Powder Turn Rocker profile; lightweight paulownia wood core construction; and versatile 98mm waist width, the new Sky 7 HD offers an ultra-lightweight blend of all-mountain versatility, effortless float, and accessible backcountry performance. No matter where the snow takes you, whether resort-based or backcountry bound - the future of freeride is here.
Rossignol Experience 84	162, 170, 178	Experience 84 HD blends the heart of a high-performance carving machine with a smooth, effortless freeride feel. It's racing DNA meets freeride. Precision and power meets effortless float. It's everything you need for the ultimate one-ski-quiver. The entire mountain awaits.
Rossignol Experience 77	152, 160, 168, 176	With the heart of a frontside carver and an easy freeride feel, the EXPERIENCE 77 is the all-mountain benchmark for intermediate skiers. Now featuring revolutionary Air Tip technology; our most versatile blend of rocker and camber.
Rossignol Smash 7	140, 150, 160	The Smash 7 supplies lightweight agility and enhanced durability for freeride dominance. Powder Turn Rocker delivers fatigue-free maneuverability.
Rossignol Sassy 7	140, 150, 160	SASSY 7 is a women's all-mountain powder ski for up-and-coming rippers. Featuring the 7-Series' award-winning blend of versatility and float, the Sassy 7 supplies lightweight agility and enhanced durability for freeride dominance. Powder Turn Rocker delivers fatigue-free maneuverability, effortless steering and instant speed control, making powder skiing easier and more fun.
Rossignol Soul 7 HD W	162, 170	lightweight paulownia wood core construction; and 106mm waist width, the new Soul 7 HD W is the ultimate fusion of lightweight backcountry innovation
Rossignol Sky 7 HD W	162, 170	With noticeably more edge grip, stability, dampness, and drive, the new Sky 7 HD W provides instinctive versatility and ease-of-use, while delivering groundbreaking, high-definition energy, mobility, and strength due to our unique new carbon and basalt weave.
<b>RMU</b>		
RMU P802	178	A tribute to the birth place of american skiing, Vermont, with almost 90% camber underfoot and a progressive turning radius the P802 is designed to rail through crud and chop with ease. The early taper in the tip and tail allow the skier to maneuver with almost no effort. A playful powder ski for easy, drifty turns.
RMU Apostle	175, 185	The Apostle powers the skier through adverse snow when engaged and is playful when skied over center. The five point design really defines this as an all mountain charger. There are five different widths running down the length of the ski; these varying widths allow different portions of the edge to engage in varying snow conditions. Being named after the rugged Apostle peaks in Colorado, this ski embodies what a Rocky Mountain skier needs to charge in the backcountry.
RMU Apostle 98	175, 185	Keeping true with the original five point design and progressive side cut, gives this ski more effective edge contact than ever. From variable hard pack, moguls and powder the Apostle 98 has commanding edge to edge transfer ability and a surfy feel when on softer snow. The versatile size and contemporary construction of the Apostle 98 make it viable weapon for all season charging.
RMU Noth Shore 2.0	185	Big mountains, big lines and dynamic control. The North Shore challenges the mountains, while leaving the skiers in control. The North Shore is destined for the deep, the Professor charges the untracked. Powder day into an commanding yet playful flex allow the Professor to turn any float and day into an
RMU Junia	162	Our all new Junia 95 is the go anywhere doanything women's specific award. Lady rippers from all over the world wanted their own version of our award winning Apostle and we have answered their call. The Junia has a 95mm waist with a perfect blend of rocker and camber. This multi-faceted tool holds an edge when you need it, plows through crud, and floats in the fluff.
RMU Valhalla	172	The Valhalla is a brand new women's specific ski. Loosely based on our North Shore, the Valhalla is a hard charging big mountain powder slider. Its 104mm waist combined with its blend of rocker tip and tail and camber underfoot makes it a perfect addition to the RMU line. We are continuing our uncompromised backcountry trend for the strong lady shredders of the world. It is not "shrinked and pinked," but rather designed by a wide range of women athletes, pros, and patrollers.
<b>SALOMON</b>		
Salomon Qst 99	167, 174, 181	Whether you're looking for a beefy ski for those late-season touring missions or an everyday hardpack charger, this will provide the stable platform you've been searching for, and you've got an all-mountain machine chomping at the bit to tackle wherever your day may take you.
Salomon Qst 92	161, 169, 177, 185	porting a healthy dose of versatile tip rocker and a power platform, you'll be busting through crud, facing zipper lines, and arcing turns on the groomers like a
X Salomon Qst 85	161, 169, 177	With smooth All-Terrain Rocker in the tip, you'll deflect manky snow and blast through week-old chop with ease. And when you track back onto the groomers, the tight turning radius will have you arcing turns like a former collegiate slalom racer.
X Salomon Lux 92	153, 161, 169	Thanks to a quick turning radius, the QST Lux is equally at home in the back bowls and on frontside groomers, while the Hook-Free Taper and Koroyd tips keep your legs feeling fresh long into the afternoon.
X Salomon Myriad 85	153, 161, 169	A narrower footprint isn't always a bad thing, and the Salomon QST Myriad 85 Skis are a testament to that notion. Whether you're just discovering backside bowls or need an everyday ski for the East Coast, the Myriad 85 features a healthy dose of nose rocker up front, and a stable, cambered section underfoot for arcing turns and blastline chop with ease.
<b>VOLKL</b>		
Volkl One	176, 186	The Volkl One, with a shape of 138-116-130mm, is designed for skiers who want a powder ski that they can also ski in chopped up crud, wind blown snow, and even crust. The early taper in the tip and tail allow the skier to maneuver with almost no effort. A playful powder ski for easy, drifty turns.
Volkl 100Eight	173, 181	A 141-108-124mm shape, flat tail, Full Rocker, Smart Early Taper, and a relatively open radius all combine to make this a top rated product for the skier seeking an all mountain freeride ski that can handle variable snow and
Volkl 90Eight	163, 170, 177	the 90EIGHT is an incredibly versatile all-mountain ski that handles anything from bumps, to trees, to groomers, and even powder and crud. The early-taper sidecut and open radius allow you to steer it anywhere you want to go and rip up the mountain with an easy, cruisy feel.
Volkl 100Eight W	157, 165	Its 141-108-124mm shape, flat tail design, Full Rocker, Smart Early Taper, and an open radius combine for a smooth, playful ride in a variety of conditions, from deep powder to groomers
Volkl 90Eight W	156, 163	the 90EIGHT W is ideal for the skier who wants a nimble, easy-handling ride without sacrificing smoothness and stability. No matter what mother nature hands out, this ski is a go-to. It's maneuverable in soft and variable snow, yet has plenty of punch for the groomers.
